IP67 Classic Waterproof Protective Case

MEIJIA is a prestigious IP67 classic waterproof protective case manufacturer and supplier in China. With advanced production equipment and management & technical team, our protective cases are tough and practical. Having features of reliable waterproof, shockproof, anti-riot, the IP67 classic waterproof cases can be used to carry valuables and precision equipment like computer, ipad, pistol, lab instruments and so on. We've been specializing in IP67 classic waterproof protective cases production and export for many years, and we sincerely hope to establish a long-term partnership with you.

High-quality IP67 classic waterproof protective cases are provided by the Chinese case supplier, MEIJIA, for customers all over the world. The IP67 classic waterproof protective cases are made of modified PP engineering plastics and has the feature of tough, elasticity, waterproof and dustproof. The case can prevent the penetration of the dust and the short immersion of the water. Those features make the cases available to protect the objects inside. The color of the IP67 classic waterproof protective case is elegant black, which could meet the aesthetic needs of most users in the world.

MEIJIA IP67 classic waterproof protective case Introduction

Model: MJ-5020/1495-21.62'

MEIJIA, one of the most largest IP67 classic waterproof protective case factory in China. The factory covers an area of 110,000 square meters, and has 900 workers and 160 injection molding machines of 800g-10000g. The annual sales have reached 30 million US dollars. Having dozens of technical engineers, technical backbones, new product research capabilities and market competitiveness, the production technology of MEIJIA is extremely strong, and MEIJIA has ISO9001, GS quality system certification.

Nowadays, precision instruments and equipment are used more and more frequently in both military and civilian fields. How to effectively protect these expensive and delicate equipment during storage, transportation and use is a problem that every user must face.

Traditional precision instruments are often wrapped in plastic foam paper, and the outer layer is then packed in wooden boxes. The advantage of this is that the cost is very low, but the inability to use it multiple times will also have a certain impact on the environment. If it needs to be exported to foreign countries, the wooden box must also be sterilized. If it

is exposed to water or falls during transportation, it is difficult for the traditional plastic foam paper and wooden box to provide all-round protection against water and shock.

The MEIJIA IP67 classic waterproof protective case can protect precision instruments in all directions, and the protection functions such as waterproof and shockproof have reached IP67. The materials of IP67 classic waterproof protective case is modified PP engineering plastics, which is elastic and tough, and has the properties of flame retardancy, strength, impact resistance, etc. The internal shock-absorbing lining can also be customized according to the appearance of the precision instrument. The lining of the instrument is fully wrapped in which the instrument is stored, which can ensure the safety of the precision instrument even if it falls.

MEIJIA IP67 classic waterproof protective case Parameter (Specification)

Messages

- 21.62' plastic portable toolbox
- one plastic handle
- two plastic buckles in front of box
- Water Proof and Shock Proof
